

EASTERN MICHIGAN UNIVERSITY

ARTICULATION GUIDE

October 2006

Owens Community College – Associate of Applied Science in Dietetic Technology Eastern Michigan University – Bachelor of Science in Dietetics

Purpose:

Bring a copy of this articulation agreement to all advising sessions.

This articulation agreement was developed to provide a smooth curriculum transition for students who want to complete the Dietetic Technology program at OCC and transfer to EMU to earn a Bachelor of Science in Dietetics. The agreement is designed to minimize loss of credits and duplication of coursework in transferring.

Requirements:

1. Complete the Dietetic Technology program at Owens Community College and the coordinated program of study for the Bachelor of Science in Dietetics program at EMU as indicated on this articulation guide. Any substitutions or waivers should be made with the guidance of an advisor or counselor to assure that all requirements are met.
2. Students whose transcripts are endorsed as “Ohio Transfer Module Complete” by the community college will only be required to meet EMU’s additional four general education requirements, indicated on the attached articulation guide with a “1”, and listed below:
 - a) a course in advanced written composition, speech, or a foreign language [ENG 120 or ENG 130 at Owens]
 - b) a course in mathematical reasoning [MTH 126 at Owens]
 - c) a cross-cultural course [DTC 358 at EMU], [SOC 220 at Owens]
 - d) a course in computer literacy [IST 131 at Owens]

To use the Ohio Transfer Module, students should request an evaluation of their transcript in the Owens Community College Registrar’s Office. Students who do not satisfy the Transfer Module will have to complete all EMU general education requirements not already completed.
3. Only courses with a grade of “C” or better (2.0 on a 4.0 scale) will be accepted for transfer to EMU. A course completed with a grade of less than 2.0, if counted toward graduation at the community college, may be used to satisfy the Ohio Transfer Module. However, the course will not transfer and will have to be repeated if it is a requirement of the Bachelor of Science in Dietetics. Students must have an overall GPA of 2.0 to be given credit for the Transfer Module. If an Owens course has more credits than the EMU equivalent course, the additional credits will be included in the program total.
4. Under this agreement, EMU will waive the 60-hour rule and require only that a minimum of 30 credit hours must be taken at EMU, 21 hours of which must be in the major/program with 15 hours at the 300/400 level. Of the last 30 hours completed before graduation, a minimum of 10 hours must be in courses offered by EMU. A minimum of 124 credit hours, completed in-residence or accepted in transfer, is required for graduation.
5. Students must meet all admission requirements at the time of admission to EMU, including submitting transcripts from all previously attended colleges.
6. Students should meet with the EMU Dietetics advisor early, before completing an admission application to EMU. A copy of the articulation guide should be included in the application to EMU and brought to all advising sessions. Copies of this agreement are available at www.emich.edu/ccr/artguide.htm.

Effective Dates: April 15, 2006 until April 15, 2009. In fall 2007 this agreement will be updated to be consistent with EMU’s new general education requirements that go into effect at that time. Owens students, who began this articulated program prior to fall 2007, may continue to follow the current requirements. Owens students who begin the articulated program in fall 2007 or later will be required to meet the new general education requirements. If this agreement is not renewed at the end of the effective period, students will have an additional four years to be admitted to EMU under the terms of the agreement.

--	---

¹ Meets one of EMU's four requirements in addition to the Transfer Module. See page I, #2 for more information.
² All of the Owens credits will transfer, although only 84 credits will be counted toward the required program total of 124 credits.
³ In order to enter the professional sequence with the appropriate pre-requisites, these courses may be taken as an EMU guest student while still enrolled at Owens.
⁴ A minimum of 124 credits are required to graduate.
 *Course is offered on-line.
