

White Pine Systems, LLC

Employment Opportunities

White Pine Systems, an early stage Ann Arbor company focused on consumer-focused healthcare solutions that connect physicians, hospitals and families. We are looking for a few key people to help us improve our products and services to meet current contracts and a growing market.

White Pine's flagship product, called SPINN, allows hospitals, insurers and other organizations to offer full featured patient portals and Personal Health Records systems designed around specific health interests, like diabetes, heart disease or substance abuse.

SPINN is a web-based application suite that provides secure access to personal, medical and behavioral health information allowing users to provide controlled access to personal health information and gives new tools to improve health. The platform uses cutting-edge web technologies and integrates with Microsoft HealthVault and other personal health platforms.

Join our growing team to mature and innovate WPS's platform by developing new features, frameworks and services that can reach millions of users.

If participating in this growing and important market is interesting, drop us a note at ddormer@SPINNphr.com or bchick@SPINNphr.com, or call 734.730.2207
