Science Success Center Writing Support

In January 2014, the Science Success Center (SSC) opened, dedicated to working with students across all levels and in many disciplines. In its inaugural semester, Writing Center staff housed in the SSC worked with a total of 359 students. That number climbed to 589 students in the fall 2014 semester. As Figure 1 shows, that 64% increase can be attributed to a growing number of students seeking our support for 100 and 300-level courses.
