INTRODUCTION TO NEUROSCIENCE
NSCI 301 - Fall 2016

MW 9:30 to 10:45 am (CRN 16552)
This NEW INTERDISCIPLINARY course will be offered by faculty from the Departments of: Biology - Dr. Mast, Chemistry - Dr. Evans, Psychology - Dr. Breza

**Counts as an elective for Biology, Biochemistry or Psychology Majors**

A global overview of contemporary topics in neuroscience including molecular and cellular mechanisms, structure-function of the nervous system, and brain-behavior relationships will be covered. Diverse topics will include:

- The Nervous System
- Development and Neuroanatomy
- Neurotransmitters and Behavior
- Sensory and Perception
- Movement
- Sex
- Thirst and Hunger
- Emotions and Limbic Anatomy
- Stress and Aggression
- Learning and Memory
- Attention and Cognitive Control
- Language
- Social Cognition
