Counseling Program Outcomes
2016-2017

Clinical Mental Health Counseling
College Counseling
School Counseling

Graduation and Completion Rates
Between June 2016 and April 2017, 25 students graduated from the three counseling programs: 13 from Clinical Mental Health Counseling, 7 from College Counseling, and 5 from School Counseling. The majority of our students are part-time and work while they attend school, yet a very high percentage of students who begin their programs go on to graduate. While students have 6 years to complete their programs, the average time it takes is three years. Approximately 95% of those who are admitted and begin their programs do graduate within 6 years.

Employment
19 program graduates (graduation between April 2016 and December 2017) were asked whether they were employed in positions for which they were trained within 6 months of graduation. 16 responded (84% response rate). Of the 15 graduates who were actively looking for employment, 14 (93%) reported that they were employed in counseling jobs within six months of graduation. One person took slightly longer than six months to find a school counseling job. Thus, 100% of the graduates were employed in counseling jobs within a year of graduation.

National Examination Pass Rates
To obtain licensure in Michigan, graduates must pass the National Counselor Examination (NCE). Over the last six administrations of the test, we had a 100% pass rate.
