**Basic Features**

Your voice message storage capacity is limited to 19MB. A one minute message takes up approximately 480KB of storage providing for approximately 39 saved messages. Mailbox quotas have three different levels of warning messages: warning, send, and send/receive. Mailbox users will receive a quota warning message as follows:

- **Level 1 - Send and receive still possible** (15MB stored, approximately 30 minutes of recording)
- **Level 2 - Sending messages not possible** (17MB stored, approximately 35 minutes of recording)
- **Level 3 - No sending or receiving of messages is possible until some messages are deleted** (19MB stored, approximately 40 minutes of recording)

As saved messages age they will be moved to the Deleted Items Folder in 14 days and permanently deleted from the Deleted Items Folder in 15 days.

**Note:** Some features contained in the voice message menus are currently not available such as Message Notifications, Menu Style, Directory Listing Status and Transfer Settings.

**Voice Message Main Menu**

All message options are accessed from the Main Menu (shown below) and each menu that follows by pressing the assigned number keys ‘0-9’ and character keys ‘*’ and ‘#’.
