

Issuing Digital Evaluations:

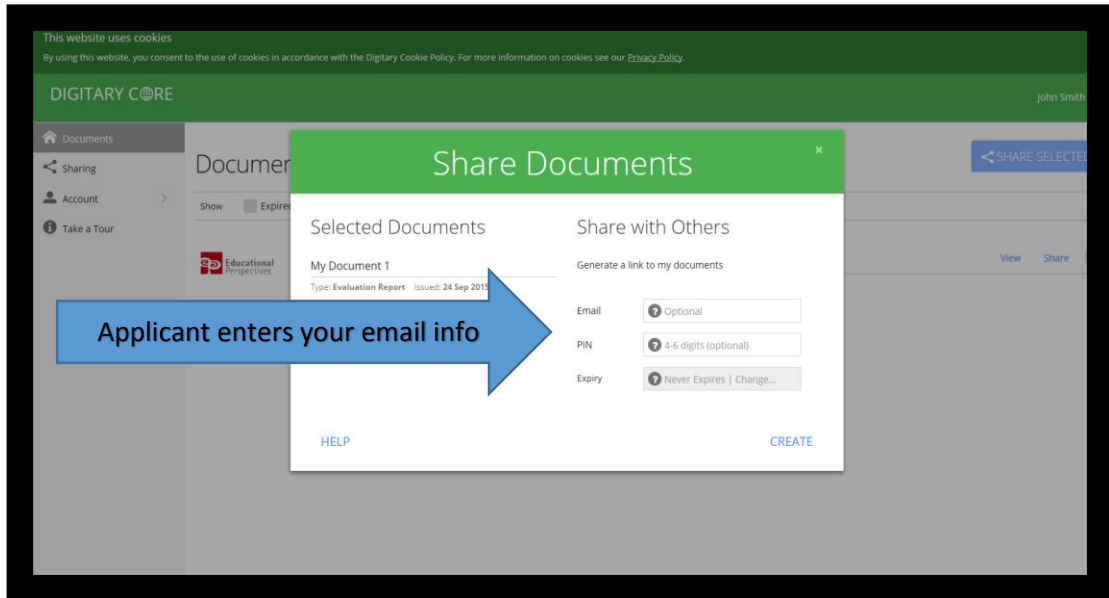

- Educational Perspectives' (EP) evaluations are issued using the Digitary platform - a digitally secure, signed and sealed method that enables your applicants to share their reports with you online.
- Your applicants will access their completed and digitally certified evaluation reports via a secure web portal in read-only form and may share the evaluation with you via a secure link.
- This process is done in a controlled, audited manner. Should your applicant decide to share their report with you online, you will receive an email containing a link from Digitary Core (relay@digitary.net). The link will allow you to download, authenticate, print, or save the evaluation report.
- EP gives you the assurance that what you receive through Digitary is authentic and tamper-proof.

Sharing an evaluation using Digitary:

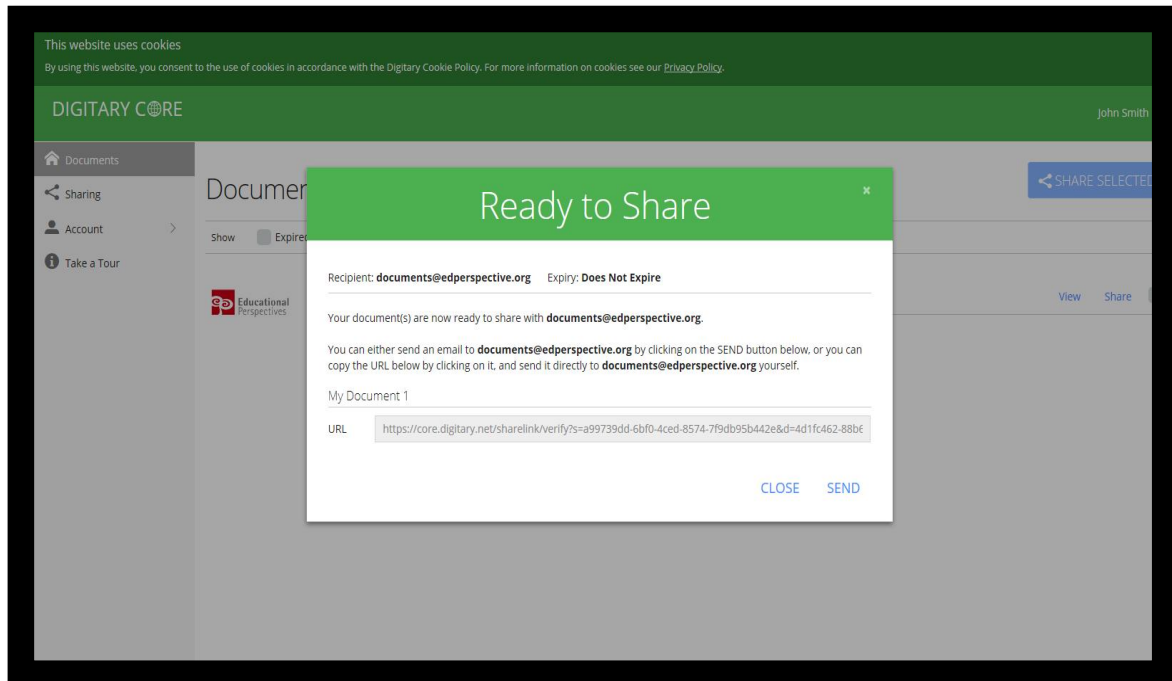

1. This is an example of an applicant's Digitary account following EP's release of their evaluation report. After EP has released an evaluation report, the complete report is digitally accessible in the online portal as you can see below. They can click on the document and their evaluation report opens.

2. If your applicant decides to share the digital evaluation report with you, they enter your contact details.

3. Once your details are entered properly, your applicant shares their evaluation report with you.

- Here is an example of what the email from Digitary Core looks like. You would simply click the 'View document' option and have access to your applicant's evaluation report and credentials.
