What is the Math Facts Challenge?
The Math Facts Challenge is an exciting competition that aims to motivate students to achieve math fact fluency, a critical component of the Common Core State Standards, across all grade levels. Students in 1st-8th grades compete in a series of head-to-head competitions on grade level facts. Each grade level is assigned a particular set of facts, ranging from addition facts to multi-step equations.

History of the Math Facts Challenge
The Math Facts Challenge has taken place in-house at PACE Academy for several years as a school-wide competition. In 2014, PACE hosted its first multi-school event, inviting four other schools into the competition. A total of 200 students competed. Eastern Michigan University’s Charter Schools Office agreed to host the 2015 competition. Twelve charter schools will participate in this year’s competition.
