

FALL 2021

GRADUATE COURSES - AGING STUDIES

AGIN 512/SWRK 625 PSYCHOSOCIAL ASPECTS OF AGING OVER THE LIFE COURSE

Dr. Stephanie Wladkowski

This course integrates an overview of complex systems within the field of gerontology, from a theoretical and practical perspective, that impact not only the health and well-being of individuals over the life course, but the health and well-being of caregivers and communities as well.

2.00 Credit hours

Online

Wednesdays 5:30pm-7:10 pm

AGIN 518 INTRO TO ALZHEIMER'S DISEASE AND RELATED DEMENTIAS

Jean Barnas

This introductory course provides an overview of Alzheimer's disease and related dementias, including changes that occur in the brain throughout the stages of progressive dementia, the clinical features of Alzheimer's disease and related dementias, assessment, treatment options, and the impact dementia has on individuals with dementia and their families.

2.00 Credit hours

Online Asynchronous

AGIN 519 ASSESSING AND PREVENTING ELDER ABUSE

Janet Hunko

This course will provide students with an in-depth knowledge of elder abuse and its prevention. Topics include the shifting demographics of our population, types of abuse, risk factors for victims and for those who commit abuse, screening tools and assessment of abuse, interventions, community resources, and elder abuse prevention advocacy.

2.00 Credit hours

Online synchronous

AGIN 570 BIOMEDICAL ASPECTS OF AGING

Dr. Cassandra Barragan

This course is designed to support a practical understanding and application of the biomedical aspects of aging. It is intended to meet the learning needs of a diverse audience who do not necessarily have a biology background but wish to understand the effect of aging on the human body.

2.00 Credit hours

Online synchronous

UNDERGRADUATE OVERRIDES
