

Project Title: Immersive Community, Culture, and Care Experiences for Undergraduate Nursing Students: The 360-Degree Difference

Title Deliverable #1: Cultural Awareness Immersion and Introduction to Social Determinants of Health: The 360-degree Difference

Please following the instructions below for the use of the 360-degree video simulation for Fundamental level nursing students.

1. Nursing Faculty, please review the debrief form which was created to guide faculty in debriefing the case with students. It may help to review this first so that you can watch the video knowing expected dialogue afterwards.
2. Have students watch the pre-brief video prior to the simulation.
3. Have students complete the Fundamentals Pre-test.
4. Have students watch the Fundamentals 360-degree video. Please note, you can scroll around the entire video in 360-degree regardless of scene. Embedded into the main video is the health fair interview, interactive features, and videos of the community in which the patient resides. Access the video via the following link:

<https://cinema8.com/video/zOwao5Xl>
5. After the video, have students gather for a guided debrief with the facilitator. After the debrief students can then take the Fundamentals post-test.
6. Please preview the document on acronyms and references for the 360-degree video series.
