

DARE 2 DESIGN!

Turn your idea into a reality

THE DETAILS

Inviting all 2-5 graders to participate in **Dare2Design**, a fun program for young minds full of ideas. Discover cool innovations, work with scientists, make new friends as you together build innovative models that solve everyday problems we all face.

Where and When?

Weekly after-school flex program online/ hybrid or at SPARK East Innovation Center, Ypsilanti, MI

Days Tuesdays, starting Oct 18, 2022 (15 sessions)

Time 5.30 pm-7.00 pm

Program fee and resources?

Program fee is \$358 per student. Students may bring a laptop.

About DARE2DESIGN

What is DARE2DESIGN?

Dare to Design is a program for 2-5 graders to develop an innovative mindset. The students will go through the 8-step process of innovation to solve a problem they face regularly. This fun, hands-on camp teaches, problem-solving, collaboration and the process of innovation.

Is DARE2DESIGN for you?

Do you think there are problems or issues around you that you want to fix? Do you love building and designing solutions? Then Dare2Design is for YOU! With Dare2Design you will identify a problem, record your steps as you solve it, build a model that solves the problem and demonstrate it.

Why DARE2DESIGN?

By guiding the students to understand problems better and fix them by designing a solution, we work to develop the participants' innovative mindset, problem-solving skills, entrepreneurial abilities, critical thinking, and collaboration.

You will work with university professors and industry professionals with patenting knowledge and experience. We use a rigorously tested 8-step process to make it a fun and productive experience for the participants. We will engage in understanding, breaking and making, not just watching!

In March 2023, participating students will have an opportunity to showcase their prototype at EMUiNVENT, a regional invention competition to win cool prizes.
