This Student Handbook for Educational Studies doctoral students supplements the Graduate catalog and introduces students to the program. It is also intended as a guide for students accepted into the Educational Studies program as they proceed in their studies. The Handbook describes the program and its history, clarifies requirements, expectations, admission requirements, criteria for graduation, sources of financial aid, and information on specific concentrations. In addition to the Student Handbook, a program advisor assists with program planning and closely monitors student progress.

Program Mission
To Create a Community of Scholars

The overall mission of the Ph.D. in Educational Studies is to create a community of scholars where working professionals come together to study the complexities of teaching/learning relationships in a variety of educational and community contexts. These relationships are critical elements in the creation of sustainable and viable communities—places where children’s healthy development is fostered, professionals serve their institutions and communities effectively, and citizens and community residents make decisions that promote the best interests of their communities. In order to teach people what they need to know to create sustainable communities, teachers and learners come together in many contexts: public and private schools, colleges and universities, non-profit organizations, hospitals, businesses, etc. The work of educators in all of these varied contexts becomes critically important, especially in economically impoverished communities. This mission is well-aligned with the University and College of Education mission statements provided below.

The focus of study in the program is both theoretically rigorous and grounded in best practices. Doctoral students in education should be able to understand, analyze and use a broad spectrum of epistemological perspectives. Students draw on a broad base of scholarship-learning theories, curriculum theories, social theories and philosophy, pedagogical theories-to examine educational structures, policies, practices, technologies, and the role of education in developing healthy communities.
EMU Mission Statement

Eastern Michigan University is committed to excellence in teaching through traditional and innovative approaches, the extension of knowledge through basic and applied research, and creative and artistic expression. Building on a proud tradition of national leadership in the preparation of teachers, we maximize educational opportunities and personal and professional growth for students from diverse backgrounds through an array of baccalaureate, master’s and doctoral programs. We strive to provide a student-focused learning environment that enhances the lives of students and positively impacts the community. We extend our commitment beyond the campus boundaries to the wider community through service initiatives, and public and private partnerships of mutual interest addressing local, regional, national and international opportunities and challenges.

College of Education Mission

The mission of the College of Education is to create an exemplary educational environment to develop the intellectual curiosity, creativity, critical and reflective thinking and problem-solving abilities of our students so that they may become ethical, productive, and contributing participants and leaders in a democratic and diverse society.

Program Goals

The goals of the Educational Studies Doctoral Program are:

- To engage in advanced study and original research to advance the field of education.
- To make research findings available and accessible to the academy and educational practitioners, policy-makers and the community at large.
- To prepare researchers, scholars, educators and policymakers for professional roles within post-secondary, P-12 schools and other educational contexts in the community.
- To prepare educators who understand that human differences and environmental factors are at the heart of complex educational process and democratic communities.
- To prepare educators who will promote and develop strong community partnerships, recognizing and responding to the particular needs of impoverished communities.
- To use the critical study of educational issues as a foundation for research and advocacy about social and ecological justice, human rights, and equity.
• To prepare educational professionals able to respond to a changing world in the 21st century including the impact of globalization, demographic changes, emerging technologies, etc.

Degree Requirements
• A minimum of 60 graduate semester credit hours beyond the Master’s degree
• A minimum of nine semester credit hours in the coursework for the Research Core.
• A minimum of nine semester credit hours in the coursework for the Education Core.
• A minimum of 24 credit hours in coursework for the required concentration courses and selected electives.
• A minimum of three semester credit hours in the Internship.
• A minimum of 15 credits of Comprehensive Examination and Dissertation.
• At least 30 credits of graduate coursework in the program must be at the 700 level and above.
• At least 48 semester credit hours of graduate coursework must be at EMU

Program Matriculation
Important: Students have 7 years to complete a PhD program, according to EMU policy. The 7 years begins with the year that you begin classes OR the earliest year of any transferred courses. Students have the right to apply for an extension of a maximum of 3 years. See the Graduate School Policy under section XXV:

Extension Petition applications can be found HERE:
https://app.emich.edu/gradpetition/views/login

The Educational Studies Doctoral program can be divided into five distinct phases:

1. coursework
2. internship
3. comprehensive exam
4. dissertation proposal

Revised January 2018
Each of the subsequent sections unpacks each of these elements to guide the student through the process. The general steps for moving through these five distinct phases include:

1. Application and admission into the doctoral program
2. Meeting with academic advisor to develop a program of study
3. Completion of Education and Research Core, and Concentration courses
4. Completion of Internship
5. Selection of Comprehensive Exam Chair
6. Writing a Comprehensive Exam Prospectus (supervised by Chair)
7. Selection of and meeting with Comprehensive Committee members and Chair
8. Comprehensive exam
9. Selection of dissertation committee (chair and members)
10. Preparation of dissertation proposal
11. Defense of dissertation proposal; successful defense confers "doctoral candidacy" status; use the Dissertation Manual as a guide
12. Dissertation research and writing
13. Dissertation defense; if successful, revise written document per committee comments
14. Submit revised document to the Graduate School for review – see deadline dates and checklist
15. Apply online in my.emich to graduate
16. Complete required dissertation edits; submit document to ProQuest
   (http://www.emich.edu/library/databases/iadFullList.php) and EMU Library
   (http://www.emich.edu/library/) through Digital Commons
   (http://commons.emich.edu/)
17. Complete Survey of Earned Doctorate for those earning a Ph.D.
18. Graduation – attendance at Commencement ceremony is rewarding, though not required

Each of these steps is explained in detail in the Graduate School Dissertation Manual.
(http://www.emich.edu/graduate/)
Educational Studies Program Elements

Structure and Curriculum

Two sets of Core courses and an Internship ground the work students will do in the concentrations. The two sets of Core courses include the Education Core (9 credits) and the Research Core (9 credits). These are required of all students regardless of the selected concentration area. Concentrations consist of 24 additional credit hours. The program exit requirements consist of three pre-dissertation credits (Comprehensive Exam—3 credits) and 12 Dissertation credits (Dissertation Proposal—3 credits, and Dissertation—9 credits). These pieces of the program are detailed in Figure 1 below.

Pre-Candidacy

**Education Core:**

EDST 800  Seminar I: Introduction to Educational Studies: Scholarship, Teaching and Learning
EDST 801  Seminar II: Education, Democracy and Social Thought
EDST 802  Seminar III: Education, Communities and Globalization

**Research Core:**

EDST 805  Quantitative Methods I
EDST 806  Qualitative Methods I
EDST 807/808 Advanced Quantitative or Advanced Qualitative Methods

**Internship:**

EDST 889  Internship
(May focus on research, teaching, program development, or community service)

**Pre-Dissertation:**

EDST 815  Comprehensive Exam (3 credits)
(Includes prospectus development)
Candidacy

Dissertation:

EDST 895  Dissertation Proposal (3 credits)
EDST 896/7/8/9 Dissertation (minimum 9 credits)

Required Courses for all Concentrations

Education core. There are three seminars in the Education Core for a total of 9 credit hours. These seminars comprise a) Seminar 1: an introduction to research in education, and guidance into doctoral studies b) Seminar 2: a strong foundation in the major paradigms of social theory and philosophical thought regarding education’s role in developing a democratic society, and c) Seminar 3: a grounding in the impact of cultural and economic globalization on schools and communities in the US and worldwide, and the role of education in addressing the consequences of these forces. Course substitutions must receive the approval of the student’s advisor and the Program Coordinator(s).

Research core. The Research Core consists of a sequence of research methods courses for a total of 9 credit hours. All students take the Quantitative Methods I course and the Qualitative Methods I course. When these are completed successfully, students then choose either Advanced Quantitative Methods or Advanced Qualitative Methods, depending on the focus of their dissertation research.

Program Concentrations

The PhD in Educational Studies was designed to offer a variety of concentrations in addition to the Core courses. The program currently offers one concentration: Urban Education. Each concentration has its own particular focus and is founded upon an understanding of the relation between education and the social context of communities in an expanding global context. Each 24-credit hour concentration is made up of at least 12 hours of required doctoral level courses (four 3-credit hour courses) and up to 12 hours of restricted electives.

Urban Education Concentration

The Urban Education concentration prepares students with Master’s degrees for
leadership roles in urban school districts, curriculum supervision and coordination, public policy and advocacy, teacher education, higher education and school-related community work. In keeping with EMU’s tradition of fostering the ties between theory and practice, the program emphasizes the creation of knowledge about urban education and the collaborative partnerships necessary to address the significant challenges that face urban areas in the 21st Century. The program will pay particular attention to the impact of poverty, racism, immigration, ecological crises, and shifting global economic forces on education across diverse geographical contexts.

**Goals for urban education concentration.** Students completing this concentration will:

- Engage in advanced study and original research from a variety of theoretical perspectives to advance understanding of Urban Education.
- Understand and be able to analyze the complexities of pedagogical practice within dynamic local, national, and global contexts.
- Solve problems and make decisions in professional practice through the use of: research, reflective inquiry, knowledge of learning and development in all populations, knowledge of diversity through the development of cultural competence, knowledge of subject matter, and professional knowledge.
- Become a member of a community of scholarship and practice committed to creating opportunities for students from diverse backgrounds.
- Be strong advocates and community partners in 21st Century social and educational contexts, with particular attention to addressing the needs of marginalized communities, advocating for social and educational policies that promote equity and social justice.
- Assume a strong leadership role in improving professional practice in urban contexts.

**Required courses** in the urban education concentration (15 credit hours):

- **URED 811** Introduction to Urban Education (3 credit hours)
- **URED 812** Children and Families in Poverty (3 credit hours)
- **URED 813** Schools as Agencies of Community Collaboration (3 credit hours)
- **URED 814** Teacher Development (3 credit hours)
URED 815  Knowledge, Learning and Pedagogy (3 credit hours)
Course substitutions must receive the approval of the student’s advisor and the Program Coordinator(s).

**Restricted electives (9 credit hours).** The remaining 9 credit hours in the concentration will be selected from a list of current or future courses in Curriculum and Instruction, Early Childhood Education, Educational Media and Technology, Educational Psychology, Reading, and Social Foundations programs in the Department of Teacher Education or other COE or EMU departments if approved by the student’s advisor. Electives at the 500 level must be approved by the student’s advisor and the Program Coordinator(s).

**Course Rollout and Sequence:** Both the required and concentration courses are designed to be taken in sequence. A student wishing to take a course out of sequence must have the approval of his or her advisor, and the Program Coordinator(s).

**Internship**

The doctoral internship in Educational Studies is a three-credit course designed to develop scholars who are prepared not only to develop knowledge but also to apply it. During the doctoral internship, students work closely with faculty members to obtain experience in an area where they may need to develop skills: teaching at the college level, teacher education, research and evaluation, professional writing, and/or service (e.g., consulting, work with professional organizations, program development). The specific field-based placement is based on a student’s interests and future professional aspirations, and is intended to provide experience in areas in which a student previously had limited professional experience. The intern is expected to engage in original projects or other activities related to research, teaching, administration and/or outreach. Internship credit is not awarded for any work completed previously. The following are guidelines to follow for the Internship:

1. Pre-requisites: EDST: 800, 801, 802, 805, 806, and 807 or 808
2. Hours: The student will complete a minimum of 45 hours during one semester
3. Supervision: Faculty who supervise the internship should have an active research agenda and qualify as a PhD affiliate.
4. Proposal: Students should create an internship proposal for approval by their
5. Final Product: A written product is required, such as:
   a. A reflection essay
   b. A paper submitted for publication
   c. Conference presentation

**Comprehensive Exam**

Students register for the Prospectus and Comprehensive Exam (EDST 815) after the completion of coursework and the internship; students may only register for EDST 815 during the semester in which the Comprehensive Examination will be taken. The Comprehensive Examination is designed to provide evidence of a student's mastery of coursework and her/his readiness to write the dissertation proposal. Successful completion of the Comprehensive Exam and subsequent Graduate School admission to candidacy are necessary prerequisites for the dissertation. Typically the Comprehensive Exam process occurs in one semester. It is recommended that the student should begin consulting with the Academic Advisor the semester prior to the Comprehensive Essay/Exam. See specific requirements and guidelines below:

**Comprehensive Examination Requirements**

The Comprehensive Essay/Exam requires students to a) utilize knowledge learned in the core Education Seminars, Research Core courses, and Concentration courses to ground a specific problem or question in a larger set of political, theoretical, and social issues, and b) to argue for an appropriate research methodology based upon a clear and coherent understanding of a variety of perspectives and approaches to research. The Comprehensive Exam is intended to prepare students to write the dissertation proposal.

The Comprehensive Exam consists of four stages, explained below:

I. Choosing a Comprehensive Exam Committee  
II. Developing a Prospectus (15 pages)  
III. Developing of a Bibliography  
IV. Written Examination
I. Choosing a Comprehensive Exam Committee

The Comprehensive Exam Committee must have at least three and not more than six members, including the Chair. At least half of the committee members must be from the student’s academic department or school. This committee does not require, but could include, the external member who is a Graduate School representative. The Dissertation Committee does require the External Member. See page 25 for details about the Dissertation Committee.

II. Developing a Comprehensive Prospectus

The student completes the Prospectus before or during the term for which she/he registers for Comprehensive credits and submits it to the Comprehensive Examination Committee. The Prospectus should reflect the student’s level of readiness and preparation to write the Comprehensive exam. Familiarity with the literature pertaining to the topic area/s and APA style and formatting should be clearly indicated in the Prospectus.

Guidelines for Writing the Prospectus:

A. Introduce your topic and situate it within the broader Educational Studies context with a focus on impoverished communities (1/2-1 page).

B. In a concise literature review, briefly synthesize the specific and salient concepts and theories that have shaped your topic. This review should give the Committee an idea of what you see as the primary content knowledge informing the dissertation and thus potential areas for the comprehensive questions. This review should also consider briefly the methodological approach planned and a short description of literature informing that choice (10-12 pages).

C. Draft three questions that address your topic from Macro, Micro and Methodological points of view. The Macro question should consider your question from a broad scholarly and socio-cultural context. The Micro question should focus more specifically on the particular question you are raising and ask you to review the literature surrounding that question. The methods question should ask you to defend why you have chosen the particular approach rather than other options from methodological, epistemological and
ethical points of view and explain how you plan to conduct the research (1 page). Total length of Prospectus: 15-page maximum excluding references.

D. After approval of the Prospectus, The Prospectus Approval form shall be attached as a cover sheet to the student's Prospectus. The form identifies the student, the expected term of enrollment in the Comprehensive Essay/Exam, the committee chair, committee members, and the faculty advisor. The student is responsible for obtaining signatures from all committee members before submitting the form to the concentration coordinator. The concentration coordinator will sign and forward the form to the doctoral program coordinator for approval. A copy of the form should be returned to all parties and placed in the student's file.

III. Developing a Comprehensive Exam Bibliography

The student will prepare a bibliography in consultation with the Chair and all members of the committee.

A. A first draft will be shared at the Prospectus Meeting to be added to by each committee member as they see fit in accordance with the content areas of each comprehensive exam question.

B. The sources included will represent the committee’s expectation for the literature and ideas that each member expects the student to be able to address in the Comprehensive Exam.

C. In addition, the bibliography may include course readings from courses in the EDST Program relevant to the questions on the exam as suggested by committee members.

D. It is each committee member’s responsibility to send by email full bibliographic information for required sources to the student with a copy to the Chair within one week of the Prospectus Meeting.

E. The student will prepare the full bibliography and send it to the Chair and to the Committee members for approval.

F. Assuming that the committee members and chair agree on the sources contained therein, a Bibliography Approval Form will be signed by the chair, the committee members, and the student before the student begins the exam.

G. The fully signed form will be returned to the Chair. This form will be placed in the
student’s department file with a copy sent to the student. See Appendix for the Comprehensive Exam Bibliography Approval Form.

IV. Written Examination

A. Prospectus Meeting: The Comprehensive Examination Committee meets with the student to compose three draft questions for the essay portion of the Examination. Each question should be answered in approximately 15-20 pages (excluding references) using APA format. Questions will address:

1. Macro issues that ground the topic in social, political, economic, and educational contexts;
2. Micro issues that describe and analytically position the topic within a relevant body of literature; and
3. Methodology(ies) relevant to the topic.

B. Three Questions: After the meeting with the student, the Committee will finalize the questions and the chair will send the final version of the three questions to the student via e-mail with copies submitted to all Committee members and the concentration coordinator. The student has 30 calendar days to answer the questions and must submit his/her written response via e-mail to the Committee chair and all members by midnight of the 30th day. No extensions will be granted.

C. Notification of Written Results

1. Each portion of the written Comprehensive Essay/Exam will be assessed by the Committee as either “Satisfactory” or “Unsatisfactory.”
2. In order to proceed to the Oral Defense, all committee members need to agree that the Written Exam materials are Satisfactory.
3. Student will be notified in writing by the committee chair of the results including areas of strength and weakness.
4. If any section is deemed Unsatisfactory the student and committee members meet to identify areas of weakness and determine the next steps. Next steps could range from rewriting a response to one question to rewriting the entire comprehensive
exam. If rewriting a response to one or more questions is deemed an acceptable next step, the student will be granted 10 calendar days per question for the rewritten response. Two unsuccessful attempts on the written portion of the exam will result in dismissal from the program.

V. Oral Defense
   A. An oral defense date should be scheduled by the student and Committee Chair immediately after notification of Satisfactory completion of the written portion of the Comprehensive Essay/Exam.
   B. During an approximately one hour oral defense with committee members, the student will be asked to defend the positions/arguments taken in the written portion of the Comprehensive Exam.

VI. Notification of Results
   A. If the Oral Defense is deemed satisfactory, the committee signs that portion of the Comprehensive Exam Form (see Appendix C), a copy is given to the student, and another copy is placed in the student’s file. The original is sent to Graduate Records. The student is considered a PhD Candidate, and is allowed to proceed to and register for Dissertation Proposal.
   B. If the oral defense is deemed Unsatisfactory the student and committee members meet to identify areas of weakness and determine an appropriate timeline for a re-examination.
   C. Two unsuccessful attempts on the oral portion of the exam will result in dismissal from the program. Although the student will be dismissed from the Educational Studies Ph.D. program, the student may apply to receive an Educational Studies Specialist Degree.

See Figure 2. Chart of Comprehensive Exam Process.
*Receives a grade of "NC" and must reregister for comprehensive exams after six months.
Dissertation Proposal

The dissertation proposal is an overview of the problem or issue you would like to pursue in your dissertation, clearly describes what you would like to do in your dissertation research, and serves as the basis for the first three chapters of your dissertation in a concise 20-30 page document. The dissertation proposal provides your committee with the necessary detail to determine whether you are pursuing a researchable topic, that you have extensive knowledge in the topic and have chosen a research methodology that will answer your primary research questions. More detail on the dissertation proposal can be found in the Eastern Michigan University Doctoral Dissertation Manual (https://www.emich.edu/graduate/documents_forms/index.php).

The Dissertation Committee

The dissertation committee must have at least three and no more than six members, including the chair. At least half of your committee members must be from your academic department or school. The committee must also include one faculty member from outside your department, typically from your cognate field of study, and approved by the Graduate School. Choose individuals who represent aspects of your research interest (e.g., the major theme, minor elements, the research design methodology). One member may be from off campus (e.g., faculty from another institution, alumni, community members, corporate partners, internship supervisors, emeritus faculty). Persons external to the University must have a master’s degree but preferably a doctorate. Voting members must hold a doctorate. The final committee members, as well as any subsequent changes in the committee roster, must be approved by the chair, the department head or school director, and the Graduate School. See the Graduate School Policy for Dissertation Committee formation for more information.

Dissertation

The dissertation is an independent research project where you demonstrate your knowledge and skills in academic research and writing by adding to the body of knowledge in your chosen area of interest. The dissertation can only begin once your dissertation committee has approved your dissertation proposal and you have received IRB approval if you are conducting research with human subjects. Once all data are gathered and all chapters are completed to the satisfaction of the committee the candidate schedules a public oral defense.

Community of Scholars

The role of the doctoral program is to socialize students into the culture of academic inquiry and professional practice, and through that socialization to motivate them to participate in the scholarly community throughout their career. While much that transpires in the classroom will contribute to that socialization, the Community of Scholars supporting this doctoral program extends far beyond the classroom to engage the doctoral students in dialog and collaborative exploration with faculty in the department of Teacher Education, faculty from departments sponsoring concentrations in the doctoral program, and invited guests from the wider professional community.

The vehicles for interaction among the various members of the Community of Scholars are colloquia, formal (with outside speakers) and informal meetings scheduled throughout each semester for purposes of rich discussion of issues/ideas and sharing of research and professional activities. Sample topics for such open community meetings will include but are not limited to:

- Presentation and discussion of faculty research
- Presentation and discussion of student research (at the proposal and dissertation defense stages)
- Presentation and discussion of professional activities (such as reports on internship experiences and consultations)
- Presentation and discussion of professional activities (such as reports on internship experiences and consultations)
- Collaborative participation in and reports on the activities/effects of fluid political/social action projects related to educational policy and other contemporary issues in education
- Opportunities for collaborative research
- Invited lectures/presentations given by guests to the Community of Scholars
- Study group support for courses, comprehensive exams and proposal development
In order to institutionalize the development of a culture of scholarship, students in the program will be required to participate in and organize these colloquia. The list below is an example of roles and responsibilities.

First year cohort:
   Attend and participate in all Community of Scholars events each semester.

Second year cohort:
   Attend all Community of Scholars events. Organize, with the guidance of the Doctoral Program Coordinator(s), two to three Community of Scholars events each semester. The event should include a presentation of a contemporary issue of interest to the community by a guest from the professional community outside or within EMU, and a facilitated discussion among doctoral students and the broader community.

Third year cohort:
   Attend all Community of Scholars events and volunteer to present at these events.

Responsibilities of Doctoral Students

The following are a list of expectations for all doctoral students as they progress through the program. Given the potentially isolating nature of doctoral work it is imperative to follow through with the expectations below.

Maintain Contact with Academic Advisor

Each student will be appointed an academic advisor within the first two terms of the program. This advisor will be selected on the basis of shared academic interests and will help guide the student through the core courses of the program. Students should meet at least quarterly with their advisor. An annual review of student progress should be conducted with the advisor each fall semester. When it is time for the student to take the Comprehensive Examination, he or she may work with the same advisor, or choose another advisor whose research interests closely align with the student’s goal for his or her dissertation.

Maintain Academic Integrity

All students are expected to adhere to the principals of academic integrity. This includes
Engage in Meaningful Self-Transformation

Doctoral programs fundamentally differ from other types of programs at a University in that a student is expected to develop the habits of mind necessary to become an independent scholar and community member. Coursework is intentionally designed to provide some of the necessary tools to be a successful scholar, but the level of engagement in that coursework and the level of self-transformation will determine how well those experiences prepare someone for the dissertation. There are important skills throughout the coursework, such as mastering academic writing and citations in APA style, that are expected once a student reaches the comprehensive exam and dissertation phases of his/her program. Synthesizing and evaluating the current state of a field of interest, identifying an area in need of further exploration (in the dissertation) is a fundamental element of academic thinking and therefore academic writing. Opportunities for learning and refining these skills are provided in coursework and through participating in the Community of Scholars, but how these opportunities translate to the more individualized and independent processes of comprehensive exams and dissertation vary.

Retention Requirements

There are several levels of continual review to ensure students are progressing at an appropriate pace and in a way that encourage successful completion of the coursework, comprehensive exam, dissertation proposal, and dissertation. Given the shift from professor-directed coursework to student-directed independent research, successful completion of coursework does not ensure successful completion of the program.

Academic performance will be reviewed annually to determine whether each student is producing work of doctoral level quality using the following process:

• Students are expected to submit an annual activity report with a one page reflective
analysis of their progress in the program. These review materials will be placed in the student’s file and reviewed by the student’s advisor each year. They will also be made available for review by the doctoral committee made up of doctoral affiliates teaching courses in that particular year.

- A doctoral student must receive a B or higher grade for all core courses (EDST, 800, 801, 802,) and research courses (EDST 805, 806, 807, & 808). Furthermore, if a doctoral student receives a grade lower than B in any course taken, the faculty member who assigns this grade must notify the concentration coordinator who will facilitate a meeting between the student and his/her academic advisor.

- A Retention Review of the student's file will be conducted at the end of each year by the student's doctoral adviser and the faculty and/or the doctoral committee chair with whom the student took courses. Students who have not maintained a minimum GPA of at least 3.0 in required courses will be requested to meet with their advisor and concentration coordinator to discuss problems, concerns, and issues. Students are expected to maintain a 3.0 grade point average throughout the program.

**Satisfactory Report/Annual Review**

A satisfactory report (as determined by the advisor in conversation with the student) means that the student is free to move on to the next requirement in the program.

**Unsatisfactory Report/Annual Review**

A student’s annual review may be determined to be unsatisfactory if the following occur:

- The student received a grade of B- or below in one or more courses.
- The student has two or more Incomplete grades.
- The student has not attended classes regularly during an enrolled course.
- The student has entered the program but has not enrolled in courses during the academic year.
- The student submits plagiarized work.
- There are reports of consistent incidents of disruptive or disrespectful behavior toward another student, staff member, administrator, or professor.
- The student’s GPA is below a 3.0 overall
While unusual and unanticipated, Disruptive or Disrespectful Behavior is defined as
• Behavior that consistently disrupts class procedures or other campus events in a manner unwarranted by the content or pedagogy of the course or event.
• Unprofessional interactions with faculty, other students, or staff, including for example, dishonesty, name-calling, bullying, or harassment in person or on social media.

Probation and Remediation
If the student’s progress is found to be unsatisfactory, he or she can be put on probation for up to a year with a plan for remediation. The advisor is required to meet with the student and the Coordinator(s) of the Program to determine this outcome and the remedial plan. If a student’s GPA is below a 3.0 overall, he or she has three semesters on probation before dismissal. A student may receive lower grades in individual courses as long as the overall and program of study GPA remains above a 3.0 for graduation.

Dismissal
If no action has been taken by the student on the remediation plan, and the problems persist after the probationary period, or are found to be severe during the annual review, a student can be dismissed from the program. The advisor is required to meet with the student and the Coordinator(s) of the program to determine whether a recommendation of dismissal is warranted. If so, the recommendation will be taken to the Doctoral Coordinating Committee for a final decision. Dismissal requires a majority vote by the Doctoral Coordinating Committee.

Appeal Process
A student whose progress has been found to be Unsatisfactory and who has been either recommended for probation/remediation or dismissal by the Doctoral Coordinating Committee may appeal. See the formal EDST Grievance/Appeal process detailed below for how to file a grievance or appeal for situations that do not include specific course grades. See the Graduate Catalog for complete EMU Academic Probation & Dismissal Policies http://catalog.emich.edu/content.php?catoid=15&navoid=2153
Incomplete Grades

Students who have two (2) or more incompletes beyond the maximum university one-year parameter, or date prescribed by the instructor/advisor on the “Requirements for Conversion of an Incomplete (“I”) Grade Form, on their transcript will not be permitted to register for additional coursework until the incompletes are removed.

Grievance Policies and Procedures

The EMU Board of Regents outlines grievance procedures for grades and student employment. The grade grievance procedure can be found in the current Graduate Catalog available online. The student employment grievance policy can be found at http://www.emich.edu/studentconduct/segrivance.php. When the grievance pertains to grades or student employment, these policies must be followed.

EDST Grievance/Appeal Process

The following policy and procedures are provided by the EMU Educational Studies Doctoral program for investigating and resolving cases of alleged violation or grievances by doctoral students that do not involve grades or employment issues or to appeal a decision made as a result of an unsatisfactory Annual Review (see above). While the Program fosters open communication and resolution between parties, we recognize that in some instances this is not possible and formal procedures need to be followed.

In most instances, a grievance may be resolved to everyone’s satisfaction informally between the individuals involved. The informal process involves only those people directly impacted; there is no written grievance filed, and the resolution of the problem is acceptable to all parties. Students and faculty are encouraged to keep the lines of communication open and to protect the rights and needs of each individual. The following Steps must be followed in cases where an informal resolution cannot be found:

Step I

To initiate formal procedures, the student submits a written grievance (within 20 working days following the situation or decision in question) with a full and concise statement of the facts (as perceived by him or her) to all parties involved, the Department Head, the Coordinator of the Educational Studies Doctoral Program and the Concentration Coordinator for
the student’s specific concentration. The notice must state: (1) that a grievance or appeal is being initiated and (2) the nature of the grievance or appeal. The written grievance/appeal and any subsequent documents, including meeting notes, will be kept in a locked file in the Department Head’s office. The Coordinator of the Educational Studies Doctoral program (if the grievance does not involve the Coordinator of the Educational Studies Doctoral program) and the Department Head attempt to resolve the issue by meeting with each party. If the Coordinator of the Educational Studies Doctoral program or the Concentration Coordinator for the student’s concentration is party to the grievance then (s)he shall recuse him/herself from the process and the remaining committee members shall select from among themselves, a member to assume the Chair role for the remainder of the grievance process.

If the grievance/appeal is related to a committee decision (e.g., thesis, comprehensive exam, or dissertation committee; the Doctoral Coordinating Committee; or the Concentration Coordinating Committee), the student will provide his/her written grievance to the Coordinator of the Educational Studies Doctoral program and the Concentration Coordinating Committee Chair to be distributed to the respective Concentration Coordinating Committee in advance of the regularly scheduled meeting. The student will be allowed to address the entire committee and Concentration Coordinating Committee members may ask questions of the student and committee members regarding their decision in order to gather additional information. The student will then be dismissed from the meeting and a formal vote taken to determine the outcome of the grievance.

**Step II**

If there is a failure to resolve the issue, the student can submit a written appeal of the previous decision to the Department Head within ten working days of receiving the Step I response. In this document the student will identify an EMU faculty member to represent him or her on the Grievance Committee, at which time the Coordinator of the Educational Studies Doctoral program will ask the faculty member involved in the grievance to select an EMU faculty member to sit on a Grievance Committee. If the grievance is related to a committee decision, the Coordinator of the Educational Studies Doctoral program will select one EMU faculty member to represent the committee. The Coordinator of the Educational Studies Doctoral program will direct the two committee members (one chosen by the faculty involved; one chosen
by the student) to arrange a meeting. At that meeting, the two members will select a third member to complete the Grievance Committee (no more than two Grievance Committee members can be from the student’s concentration). The Grievance Committee members must be free from bias and able to render a just and fair decision. A member not able to do so should disqualify him or herself from the grievance review. The three representatives will meet with those involved separately or collectively to resolve the grievance and render a decision in writing within ten working days after all the information has been collected and the necessary parties interviewed. At a minimum, the committee must interview the student and may choose to interview others as needed (either side may suggest witnesses). Note that the student may be accompanied by an advocate who is a member in good standing of the University community (i.e., an EMU student, faculty or staff member) during the Grievance Committee meetings. Attorneys are not allowed to be present during the Grievance Committee meetings.

A detailed record shall be kept of the hearing, preferably a taped sound recording. If a written record is kept, that record shall be signed by all members of the Grievance Committee attesting to the fact that the written record is a true record of the hearing proceedings. The written grievance and any subsequent documents, including meeting notes and audiotapes, will be kept in a locked file in the Department Head’s office.

The Grievance Committee will determine the grounds for the grievance. Typically this will include determining if the previous decision involved a lack of due process, was arbitrary and capricious, or contributed to unfair treatment of the student. Note that the Grievance Committee is not charged with resolving the problem that led to the grievance, but will determine if there are grounds to support it. The Grievance Committee shall make recommendations if they find there are grounds to support the grievance.

**Step III**

The student may appeal the Grievance Committee decision in writing to both the Dean of the Graduate School and the Dean of the College of Education within ten regular working days after receipt of the Step II decision if the student claims that established procedures for Step II were violated.

The notice to appeal must include the (1) grounds for the appeal; (2) original grievance; and (3) Grievance Committee’s report from Step II. The Dean of the Graduate School or the
Dean of the College of Education may call witnesses or request other documentation to make a determination if the established procedures for Step II were violated. A decision will be rendered within ten regular working days after all the information has been gathered and any necessary interviews conducted. This decision shall be final; no further appeal is possible. 

Note - *It is a violation of University policy to take action against a student for filing a grievance.*

**Time Limitations**

Students have 7 years to complete a PhD program, according to EMU policy. The 7 years begins with the year that you begin classes OR the earliest year of any transferred courses. Students have the right to apply for an extension of a maximum of 3 years. See the Graduate School Policy under section XXV:

https://www.emich.edu/registrar/formslibrary/forms/GR_Academic_Policies_Graduatez_School.pdf

Extension Petition applications can be found here:

https://app.emich.edu/gradpetition/views/login

**Financial Assistance**

Financial assistance is available to graduate students through federal financial aid, scholarships/fellowships, international scholarships and graduate assistantships. For complete information regarding financial assistance and eligibility criteria, refer to

http://www.emich.edu/graduate/admissions/financialassistance/

\(^1\)Graduate School policy requires that committee chairs be tenured or tenure-track full-time faculty with a completed doctorate in the student’s specialty. In addition to the chair, committees must consist of from three to six members (normally faculty from within the degree-granting school). At least half of the committee members must be from the student’s home school. At least one member must be from outside the student’s home school and serves the committee as the Graduate School representative. One committee member may be from outside the pool of graduate faculty (e.g., faculty from other institutions, alumni, community members, corporate partners, internship supervisor, emeritus faculty). All committee members should be experts in at least some aspect of the student’s dissertation topic area. The final committee roster, and any subsequent changes in committee membership, must be formally approved by the committee chair, department head or school director, and Dean of the Graduate School.

C.10 Doctoral Student Low Enrollment Form

EASTERN MICHIGAN UNIVERSITY

Doctoral Student Low Enrollment Form

Doctoral students who have completed ALL academic coursework (excluding comprehensive exam, dissertation and/or internship), but who continue to work toward completion of those requirements may be considered full-time during periods of registration in those courses. After such registrations are no longer needed to satisfy program requirements, a doctoral student may enroll in a Continuous Enrollment (767) course and be considered a full-time student. This paperwork is required in either case. A FINAL program of study must be on file to verify eligibility.

Please note: This form may NOT be used if other courses on the program of study are not completed, or during terms in which registration in other courses exists (including, but not limited to, independent study).

PLEASE SUBMIT THIS FORM EACH SEMESTER YOU WISH TO BE CONSIDERED FOR FULL TIME ENROLLMENT – AFTER YOU HAVE REGISTERED, but prior to the beginning of the semester.

Revised January 2018
Appendix D: Student and Exchange Visitor Information Service (SEVIS) Statement

Attention students who hold an F or J visa:
To avoid being out-of-status, it is your responsibility to report within 10 days to the EMU Office of International Students and Scholars (OISS), any change in name, current address of residence, academic status (full or part-time enrollment), date of program completion, program/major change, level change (undergraduate to graduate), change in funding source (employment or graduate assistant position), probation or disciplinary action leading to suspension due to conviction of a crime. Effective January 1, 2003, EMU has 21 days from the date of the reported event to inform the U. S. Government – Department of Homeland Security, Bureau of Border and Transportation Security and the Bureau of Citizenship and Immigration Services – SEVIS database (functions of the formerly known as Immigration and Naturalization Service are a part of two new offices effective March 1, 2003).

OISS enters the data into a real-time database and new documents or I-20s are then issued to you. Remember that dropping or withdrawing from course(s) may put you below full-time enrollment. Before a drop/withdrawal change is made that reduces enrollment below full-time status, you must receive permission from the OISS. If you plan to transfer to another university, this process must begin before the end of your last semester at EMU, contact the Office of International Students and Scholars. Noncompliance could result in actions leading up to a fine, arrest, or deportation per the U.S. Government.

If you have questions or concerns, contact the OISS at 734-487-3116 (http://www.emich.edu/oiss/).
