

A delegation from Abu Dhabi Polytechnic University visited our campus on June 20 and 21. The delegation included Dr. Al Naqbi, Director of Abu Dhabi Polytechnic (ADPoly,) and Dr. Al-Shibly, Department Head of Autonomous Systems.

They met with President Smith, Provost Longworth, Dean Qatu as well as other University officials to discuss possibilities of collaboration we can develop between EMU and ADPoly.

Opportunities include developing articulation agreements that lead students earning Associate Degrees and High Diplomas at ADPoly into our Bachelor of Science Programs in different disciplines including Aviation, Technology Management, Mechanical engineering technology, Electronic Engineering Technology, Computer Engineering Technology, Construction management, Information Assurance (Cyber security) and others.

Our collaboration opportunities include working together to develop ranking of technology programs and colleges and creating opportunities for ADPoly students to advance into EMU graduate programs in technology.
