

"As part of the continuous improvement efforts and serving the needs of various constituencies, the School of Engineering Technology met with Industrial Advisory Committees of the four undergraduate technology programs on Thursday January 19. As shown in the photo, the Industrial Advisory Committees of Computer Engineering Technology program, Electrical Engineering Technology program, Mechanical Engineering Technology program , and Product Design and Development programs met at the the McKenny Ballroom. After the combined meeting, the members of each committee met independently to discuss the educational objective, student outcomes, and assessment efforts of their specific program. "
