

On Thursday October 4<sup>th</sup>, the EMU Military Science Department held their weekly Leadership Lab in the Dexter-Linwood neighborhood near Detroit Central High. Leadership Labs are held every Thursday to allow the Cadets (Students) to place classroom theory into action. The Military Science Department partnered with **Life Remodeled**, working to revitalize this area of Detroit. This lab allowed the Cadets to plan and coordinate multiple aspects for the event's success to include Team organization, Transportation, Logistics and Task Supervision. Every Cadet learned through practical application of leadership and selfless service reemphasizing the classroom instruction while providing a great service to the community. The 60+ Cadets that participated in the project focused on debris removal and disposal, clearing alleyways and overall beautification of the neighborhood.

More information on the Cadets' efforts can be found on Facebook @EMUOTC and Instagram @ROTC.EMU.
