Please note the following pieces of important information:

- 1) These guides exist as a reference tool to help you determine what order you should take the courses you need to graduate.
- 2) Each tab reflects only the subject offering. If your major requires a course from another subject in the College of Technology, you may find that course in it's respective tab.
- 3) This document only lists Fall and Winter courses, unless noted as being Summer only. Courses may be offered in the Summer on an "as needed" basis.
