

# Internship Opportunities through Bender Consulting Services

## **Global Business Services Intern in Battle Creek, MI**

Internship designed for a student to work on a dynamic team that focuses on advancing end-to-end processes to ensure orders are completed with excellence. The student must be enrolled in a bachelor or master's degree program in Supply Chain Management or Operations Management, or a related field, graduating December 2022 or later with a minimum 3.0 GPA. Students will:

- Compile and analyze customer logistics data.
- Leverage technology in order to tell meaningful stories with data.
- Track and report project performance against established metrics.
- Contribute meaningful work to the business by leading projects and reporting out on key business solutions to executive leadership.

## **Information Technology Intern in Battle Creek/Oak Brook, IL**

Internship designed for the student to be part of a robust experience based on education level, curriculum focus, as well as technology and business competency and skill set. The student must be enrolled in a bachelor or master's degree program in Computer Science, Informatics, Management Information Systems, Business Administration, or a related analytical field, graduating December 2022 or later with a minimum 3.0 GPA. Students will:

- Gain an in-depth understanding of how IT enables the business not just in your specific internship, but in your pod project as well.
- Gather, analyze, and prioritize inputs and synthesize them into business requirements that will drive the development of innovation.

- Contribute meaningful work to the business by leading projects and reporting out on key business solutions to executive leadership.

## **Sales Intern in Battle Creek, MI**

Internship designed for the student to apply key learnings to successfully assist and execute sales programs to satisfy our customer needs and help drive sales. The student must be enrolled in a bachelor or master's degree program graduating December 2022 or later with a minimum 3.0 GPA. Students will:

- Partner with the Retail Sales Team to gain experience in retail stores by performing sales and customer connection techniques.
- Assist our Account, Category Management, or Business Planning Teams with customer business plans and processes.
- Develop business communication skills and learn our go-to-market strategies.
- Deliver on key metrics and demonstrate leadership skills, while helping to create compelling sales stories

## **Supply Chain: Manufacturing Intern in Battle Creek, MI**

Internship designed for students to apply key learnings in order to successfully assist and execute different projects within a plant environment that may include continuous improvement initiatives. Students must be enrolled in a bachelor or master's degree program in Supply Chain Management, Operations Management or Engineering majors are highly preferred, graduating December 2022 or later with a minimum 3.0 GPA. Students will:

- Assist with the operations in the development and enhancement of manufacturing Standard Operating Procedures (SOPs) and Standard Operating Conditions (SOCs).
- Participate in continuous improvement projects and drive results to change processes/documentation.
- Perform operations-related data entry and create reports on key performance indicators.
- Work alongside Plant Leadership, Operations Supervisors, Operations Specialists, and frontline associates to complete day-to-day tasks.

## **Supply Chain: Supply Planning Intern in Battle Creek, MI**

Internship designed for a student to apply key learnings in order to successfully assist and execute different projects within a supply chain organization and supply planning areas. The student must be enrolled in a bachelor or master's degree program in Supply Chain Management, Operations Management, or Engineering majors are highly preferred, graduating December 2022 or later with a minimum 3.0 GPA. Students will:

- Compile and analyze company and customer logistics data to drive results.
- Gain exposure into Tableau and build out data visualizations.
- Manage components of projects that involve optimizing the logistics network and work cross-functionally.
- Track and report key performance indicators against established metrics to determine overall cost savings within logistics while leveraging dashboards created throughout the summer.

**We have these opportunities listed on Handshake, but to be considered they must send their resume and cover letter directly to me, Hanna Vojtush, at [hvojtush@benderconsult.com](mailto:hvojtush@benderconsult.com) . All applications must be in no later than September 3, 2021.**
