

At Jacobs, we're transforming intangible ideas into innovative solutions designing the future - today. As an Engineering Intern in Englewood, CO, you will too.

Put your interest in solving water and wastewater treatment challenges into action, focusing on environmental engineering solutions for municipal clients. You'll work with a team of engineers in developing process engineering, modeling, design, and water quality sampling skills all while pursuing exciting solutions.

You'll impact the world around you by helping us solve real-life challenges. YOU are the future of our company. We'll rely on you to provide support to our teams on critical projects while fostering a culture of continuous learning and inclusion as you bring fresh ideas to the table. You'll work alongside professional engineers and designers, gaining exposure to project coordination, relevant computer-assisted engineering software, data collection and so much more.

Pave the way for your career with a company that inspires and empowers you to deliver your best work so you can evolve, grow and succeed – today and into tomorrow.

Qualifications - External

- In pursuit of a Bachelor of Science degree in Civil/Environmental Engineering or equivalent from an accredited program
- Must be at least a rising Junior
- Working knowledge of Microsoft Office programs

Ideally, you'll also have:

- 3.0 GPA
- Working knowledge of AutoCAD
- A previous internship related to your field of study
- Self-driven time management and organizational skills

Typical compensation rate range for this position is \$19/hr to \$24/hr, and is commensurate with experience relative to the position.
