 Interested in a major that lets you integrate skills from a variety of fields to solve real world problems? Geoscience jobs are plentiful, salaries are robust, and the demand for young and enthusiastic geoscientists is expected to continue growing. In this class, you'll utilize the scientific method to address composition of the Earth system, fundamental processes within the Earth system and linkages between all components of the system. This course includes consideration of how humans affect the Earth, and the Earth affects humans.

* Meets EMU’s General Education requirements for Natural Science Lab.

SEE EMU’s Catalog for details.
