

AnyConnect Installation - Mac

AnyConnect is the VPN software you will use to connect to EMU systems through wireless access on campus, and from a computer off campus.

Minimum Computer Requirements

- Mac OS X 10.6 or later (English Versions Only)
- Firefox (latest version)

Installation

1. Using Firefox, type: **https://webvpn.emich.edu** (be sure to include https) in the browser's address bar.
 2. Enter your **my.emich username** and **password**.
 3. Click the **Login** button.
- Note: DUO Secondary Authorization**
- *If you use the Duo App on your smartphone, the VPN login process will automatically send a push notification to your phone.*
 - *If you use a DUO token, type your password, followed by a comma and your token code (e.g. password,123456).*
4. The VPN login process will generate a warning message regarding access to EMU's internal campus network. Review the warning message and click the **Continue** button to proceed.
 5. From the WebVPN home page, click the **Start AnyConnect** link in the middle column. Wait as the system attempts an automatic installation.
 6. From the **Manual Installation** window, click the **AnyConnect VPN** link to download the installation program.
 7. Click the **Save File** button when prompted.
 8. Locate and open the AnyConnect file downloaded in the previous step. The file should be located in the **Downloads** folder unless the default Firefox setting has been changed.
 9. Double-click the **anyconnect....pkg** icon.
 10. Click the **Continue** button to start the Installer.
 11. Review the software license agreement and click the **Continue** button.
 12. Click the **Agree** button to accept the software license agreement and proceed.
 13. Click the **Install** button to begin the installation process.
 14. If prompted, enter your **my.emich username** and **password**.
 15. Click the **Install Software** button to proceed.
 16. A message will display, indicating that the installation was successful. Click the **Close** button.

17. From the WebVPN home page, click the **Logout** button located at the top right
18. Close the Firefox browser window.

Connect to EMU with AnyConnect

1. From the launchpad, click the **AnyConnect** icon.
2. Type **webvpn.emich.edu** in the drop-down field, if necessary, and click the **Connect** button.
3. Enter your **my.emich username** and **password**.
4. Click the **OK** button.

Note: DUO Secondary Authorization

- *If you use the Duo App on your smartphone, the VPN login process will automatically send a push notification to your phone.*
- *If you use a DUO token, type your password, followed by a comma and your token code (e.g. password,123456).*

5. The VPN login process will generate a warning message regarding access to EMU's internal campus network. Review the warning message and click the **Accept** button to proceed.
6. The AnyConnect icon will display in the dock. The yellow lock indicates you are connected.
7. Click **Disconnect**. This will close your connection.
8. AnyConnect is still open even though you are not connected to EMU. To close the AnyConnect software right-click the AnyConnect icon in the Dock bar and click **Quit**.

Note : If you are having difficulty connecting to the EMU network, contact the IT Help Desk at 734-487-2120.

Disconnect AnyConnect

To disconnect from AnyConnect:

1. Click the AnyConnect icon in the dock bar.
2. Click **Disconnect**. This will close your connection.

The AnyConnect application remains open even though you are no longer connected to EMU. To close AnyConnect, right click on the **AnyConnect icon** in the dock and click **Quit**.

Note : If you are having difficulty installing or using AnyConnect, contact the IT Help Desk at 734-487-2120.
