

AnyConnect Installation - Windows

AnyConnect is the VPN software you will use to connect to EMU systems through wireless access on campus, and from a computer off campus.

Minimum Computer Requirements

- Windows 7 (or later)
- Firefox (latest version)

Installation

1. Using Firefox, type: **https://webvpn.emich.edu** (be sure to include https) in the browser's address bar.
2. Enter your **my.emich username** and **password**.
3. Click the **Login** button.

Note: DUO Secondary Authorization

- *If you use the Duo App on your smartphone, the VPN login process will automatically send a push notification to your phone.*
- *If you use a DUO token, type your password, followed by a comma and your token code (e.g. password,123456).*

4. The VPN login process will generate a warning message regarding access to EMU's internal campus network. Review the warning message and click the **Continue** button to proceed.
5. From the WebVPN home page, click the **Start AnyConnect** link in the middle column. Wait as the system attempts an automatic installation.
6. From the **Manual Installation** window, click the **AnyConnect VPN** link to download the installation program.
7. Click the **Save File** button when prompted.
8. Locate and open the AnyConnect file downloaded in the previous step. The file should be located in the **Downloads** folder unless the default Firefox setting has been changed.
9. Click the **Next** button to start the Setup Wizard.
10. Click the **I accept the terms in the License Agreement** radio button.
11. Click the **Next** button.
12. Click the **Install** button to begin the installation process.
13. If prompted, click the **Yes** button to allow the installation process to make changes to your computer.
14. Click the **Finish** button to complete the installation process.
15. From the WebVPN home page, click the **Logout** button located at the top right
16. Close the Firefox browser window.

Connect to EMU with AnyConnect

1. Click the Windows Start Menu button to view the Menu and open AnyConnect:
 - a. **Windows 7:**
 - i. From All Programs, click the **Cisco** folder.
 - ii. Click the **Cisco AnyConnect Secure Mobility Client**
 - iii. Click the **Cisco AnyConnect VPN Client**.
 - b. **Windows 8:**
 - i. From All Programs, click the **Cisco** folder.
 - ii. Click the **Cisco AnyConnect Secure Mobility Client**
 - iii. Click the **Cisco AnyConnect VPN Client**.
 - c. **Windows 10:**
 - i. From All Programs, click the **Cisco** folder.
 - ii. Click on **Cisco AnyConnect Secure Mobility Client**
2. Type **webvpn.emich.edu** in the drop-down field, if necessary, and click the **Connect** button.
3. Enter your **my.emich username** and **password**.
4. Click the **OK** button.

Note: DUO Secondary Authorization

- *If you use the Duo App on your smartphone, the VPN login process will automatically send a push notification to your phone.*
 - *If you use a DUO token, type your password, followed by a comma and your token code (e.g. password,123456).*
5. The VPN login process will generate a warning message regarding access to EMU's internal campus network. Review the warning message and click the **Accept** button to proceed.
 6. The AnyConnect icon will display in the system tray. The yellow lock indicates you are connected.

Disconnect AnyConnect

1. Open the AnyConnect icon in the system tray.
2. Click the **Disconnect** button.

The AnyConnect application remains open even though you are no longer connected to EMU. To close AnyConnect, right click on the **AnyConnect icon** in the system tray and click **Quit**.

Note : If you are having difficulty installing or using AnyConnect, contact the IT Help Desk at 734-487-2120.
