

## Why Learn German?

- German is among the ten most commonly spoken languages in the world.
- German has the largest number of native speakers in the European Union (far more than English, Spanish, or French).
- Many of the Western world's most important works of philosophy, literature, music, art history, theology, psychology, chemistry, physics, engineering and medicine are written in German and continue to be produced in German.
- 18% of the world's books are published in German, and relatively few of these ever appear in English translation.
- Germany is home to numerous international corporations
- More than 1,100 companies from German-speaking countries have subsidiaries in the U.S. (Over 200 German-based firms in Michigan alone!)

*“Die Grenzen meiner  
Sprache sind die  
Grenzen meiner Welt”  
~Ludwig Wittgenstein~*
